SUMMARY

Software Engineer with 4 years of experience developing and improving software systems, with expertise in API integrations, database development, system architecture, and debugging. Proven track record of increasing automation, improving system reliability, and delivering measurable operational improvements across financial technology and client-focused applications.

WORK EXPERIENCE

Software Engineer | Allocations, Inc

Dec 2023 - Apr 2026

- Integrated and maintained on-platform KYC data collection, processing nearly 3,000 KYC checks in 2025 and achieving a 70% automated approval rate without employee intervention.
- Integrated KYC data with banking partner APIs to automate account creation workflows, reducing account provisioning time by 50%
- Refactored UI components to eliminate direct database connections and implemented unit testing, reducing client-reported data issues by 30% and accelerating bug resolution from days to hours.
- Implemented and migrated to a double-entry ledger system, enabling a new financial reporting product line while maintaining calculation parity to ensure zero downtime and minimize filing issues during the transition.

Software Engineer Intern | Ascend Learning

May 2022 - Aug 2023

- Investigated software defects, identified root causes, and implemented effective solutions to improve product functionality.
- Collaborated with senior engineers and mentors to validate development procedures, incorporate feedback, and continuously improve technical skills.
- Documented existing code and resolved prioritized backlog tickets to improve maintainability and support ongoing development efforts.

Junior Software Engineer | NCR4 Custom Technology Solutions

Jan 2021 - May 2022

- Minimized user downtime by resolving Tier 1 authentication escalations and streamlining access recovery through secure password resets, MFA resets, and credential synchronization support.
 - Participated in code reviews and refactored code to improve maintainability, reduce duplication, and ensure adherence to software development best practices.
-

EDUCATION

Bachelor of Science in Computer Science
Kansas State University

May 2023
